| 3.2. <b>vertx:run</b> .....     | 4 |

# Chapter 1. Introduction

This is a Maven plugin for creating [Vert.x](#) applications

## 1.1. Packaging

## 1.2. Running

# Chapter 2. Common configuration

All goals share the following configuration:

*Table 1. Package configuration*

| Element  | Description               | Default                | Property       |
|----------|---------------------------|------------------------|----------------|
| verticle | Main verticle to start up |                        | vertx.verticle |
| launcher | Vert.x launcher to use    | io.vertx.core.Launcher | vertx.launcher |

# Chapter 3. Maven Goals

This plugin supports the following goals which are explained in detail in the next sections.

Table 2. Plugin Goals

| Goal                          | Description                 |
|-------------------------------|-----------------------------|
| <a href="#">vertx.package</a> | Package Vert.x applications |
| <a href="#">vertx:run</a>     | Start a Vert.x application  |

## 3.1. vertx.package

This goal will package a Vert.x application

### 3.1.1. Configuration

Table 3. Package configuration

| Element | Description | Property |
|---------|-------------|----------|
|         |             |          |

## 3.2. vertx:run

Table 4. Run configuration

| Element | Description | Property |
|---------|-------------|----------|
|         |             |          |
